

How to Measure Child's Feet

- ① Make sure the printout sizing is accurate by comparing a credit card or quarter to the outline below.
- ② Fold up the paper at the dotted line and place on the floor, so the folded section is up against the wall.
- ③ Have your child stand on the guide with their heel against the wall and measure their right foot.
- ④ Try to hold their attention long enough to measure their left foot as well.
- ⑤ If their two feet are different sizes, choose the larger size.
